Protect Your Investment and Keep Your Animals Safe!

The USDA ARS Poisonous Plant Lab and Forage and Range Research Laboratory are the premier research facilities across the West, and will be the highlight of the workshop.

Scientists and practitioners from both labs will present the latest research on Larkspur, Locoweed and other poisonous plants. The research team from the forage lab will provide information on integrating range plants into Cheatgrass sites, forage kochia and new developments in rangeland grasses.

These workshops are appropriate for producers, private landowners, land management agency personnel and veterinarians. They will highlight the most recent research and management alternatives for western rangelands.

Please join us!

Workshop Fee: \$20 per person

- Includes Workshop Materials and Lunch

Late Registration: \$25 per person

- For registrations received (not post-marked) after January 28, 2010. No lunch or materials guarantee on late registrations.

This workshop is subject to cancellation if fewer than 15 people have registered to attend by January 28, 2010.

Program Agenda

9:30-10:00a
Registration

10:00-10:15a
Welcome and Introduction
